PROFESSIONAL SUMMARY

B.Tech graduate in Information Technology with great experience in Java Full Stack Development. Comfortable working across the stack — from building backends to delivering complete solutions. A quick learner who adapts fast to new technologies, currently expanding into Generative AI and LLM Engineering.

EDUCATION

NRI Institute of Technology – B.Tech – Information Technology *06/2020 – 05/2024* | *Vijayawada, India*
CGPA: 8.1

Narayana Junior College – Intermediate – M.P.C *06/2018 – 06/2020* | *Kandukur, India*
CGPA: 7.65

Sri Chaitanya School – SSC *04/2017 – 04/2018* | *Vijayawada, India*
CGPA: 9.7

TECHNICAL SKILLS

Programming Languages: Python, Java (OOPs, JDBC, Hibernate, Spring Boot basics)
Front-End Technologies: HTML, CSS, JavaScript (Basics)
Database: MySQL, DBMS
Frameworks: Spring Boot (Basics), FastAPI
AI & Image Generation: SDXL, ComfyUI, ControlNet, LoRA Training, RAG Concepts
Tools: VS Code, Eclipse, Postman, Jarvis Labs, Claude Code, Cursor

CERTIFICATIONS

Java Full Stack Development – Codegnan IT Solutions *Completed*

AI Cohort – Generative AI & LLM Engineering *In Progress*

PROJECTS

AI Product Rendering — TULIPA Noir Blossom *ComfyUI | Flux LoRA | JarvisLabs*

- Built an AI-powered luxury product rendering pipeline for an Indian perfume brand — from brand identity to campaign-quality image generation.
- Curated a 30-image dataset and trained a custom Flux LoRA model on JarvisLabs GPU (Rank 32, Alpha 16, 2000 steps) for consistent brand reproduction.
- Built a ComfyUI workflow integrating Flux Dev, LoRA injection, and optimized KSampler settings for photorealistic output.
- Generated 5 final campaign renders across studio, outdoor, editorial, and lifestyle categories.

CT Image Segmentation (Pneumonia Detection) *Deep Learning | Python*

- Built a deep learning-based segmentation model to classify CT lung images as pneumonia or normal, assisting doctors in early diagnosis.
- Utilized dense context learning to improve segmentation accuracy and reduce manual diagnostic effort.
- Processed CT lung images to extract meaningful features for precise medical predictions.
- Achieved 95% accuracy rate, significantly enhancing reliability and speed in medical image diagnosis workflows.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
